

HPA 30/1 • 30 tons Workshop/Straightening Press

HPA 30/1 30 Ton Workshop/Straightening Press

These general purpose workshop/straightening presses come in 30 to 150 ton press power and are perfect for many repair and assembly jobs, including the straightening of beams, shafts, axles and profiles. They can also be used to remove and replace bearings, pins and bushings. The H-Frame presses are steel welded and come with adjustable table heights.

The HPA series of workshop press boasts simple operation, including the ability to stop at any position, adjustable table height, and overall control using a special joystick, 2 pc. V-blocks, and a safety valve is included to protect against overloading.

Standard Configuration:

- Pressure gauge
- Adjustable table height
- 2 V-blocks
- Joystick control

Specifications

Tonnage	300 kN (30 ton)
Distance between columns	775 mm (30")
Max. working pressure	244 bar (3600 psi)
Stroke	200 mm (7.8")
Diameter of piston	Ø125x80 mm (4.9x3.1)
Advance speed	7.5 mm/s (0.3"/sec)
Working speed	5 mm/s (0.2"/sec)
Return speed	10 mm/s (0.39"/sec)
Main drive motor	3 kW (4 Hp)
Dimensions	1500x700x1800 mm (60x28x71")
Weight	400 kg (880 lbs)
