

HPA-P 150/40 · 150 tons x 40" Hydraulic Workshop Press Brake

HPA-P 150/40 150 Ton Hydraulic Workshop Press Brake

These high-quality European built machines are a cost-effective solution for small bending jobs and prototyping. This HPA-P press offers steady smooth operation with manual and/or two-handed working controls. The one-step pressure adjustment and one-step stroke adjustment are simple to set as needed. The limit switches keep cycle times to a minimum while the adjustable table height, offering up to 16" of daylight, makes for easy manipulation of the workpieces. The guide columns on either side of the center hydraulic cylinder help to ensure steady and even pressure across the table. The HPA-P comes with a top pressbrake die and holders and a standard multi-V bottom die, both of which can be replaced with any standard or custom pressbrake tooling.

Standard Configuration:

- Top pressbrake die and holders
- Bottom die with 5 V
- Adjustment system for moving the table
- Infinite pressure adjustment
- Infinite stroke adjustment
- Adequate work space for large sheet metal
- Manual and two hand working control

Specifications

Tonnage	1500 kN (150 ton)
Max. working pressure	244 bar (3538 psi)
Stroke	300 mm (11.8")
Width of working area	1020 mm (40")
Distance btw. tables	610 mm (24")
Advance speed	9 mm/s (0.35"/sec)
Working speed	5 mm/s (0.2"/sec)
Return speed	10 mm/s (0.39"/sec)
Die table dimensions	600x1020 mm (24x40")
Die table center hole	Ø100 mm (3.9")
Motor power	11 kW (15 Hp)
Dimensions	2500x1000x2380 mm (98x39x94")
Weight	2400 kg (5290 lbs)
