

Hydraulic 3-roll bending machine RBD-3HL

Standard configuration

- Overload protection
- Hydraulic top and side rolls (3 pcs.)
- Digital readout for side rolls
- Hydraulic closure for easy removal of bent parts
- Welded, heavy steel frame
- Induction hardened
- rolls made of SAE 1050 (CK 45) steel
- Conical bending device
- Automatic lubrication
- Electronic/mechanical balancing device
- 2 bending speeds
- Operation manual

- For medium and heavy bending tasks
- The frame is of solid welded construction
- All rolls are mated to high-quality, heavy-duty ball bearings, which ensures minimum friction and even rotation of the bending rollers
- Hydraulic roller is driven by independent drive motors and planetary gearboxes
- As the planet gears are mounted directly on the rollers, the transmission of force is without power loss
- The simultaneous use of torsion bars and hydraulic units ensure maximum machining accuracy and production flexibility
