RBD-3M 12/2.5 • 4' x 0.1"
3 Roll Plate Bender

The RBD-3M model manually adjusted 3-roll plate roller is designed for light to medium jobs of up to 3 mm thick. It is used in air conditioning channels, advertising panels, and sheet metal covers. Both the top and bottom rolls are movable and driven by an electric motor and chain, and the position of the top roll is fixed via a locking lever. The bottom roll features wire grooves.

Standard Configuration:

- Double foot pedal
- Safety system
- Induction hardened rolls made of SAE 1050 (CK 45) steel
- Easy operation with mobile control panel
- Automatic lubrication

From $216/month!
